Dear Members of the Class of 1994,

Having served as President of Hahnemann University during much of the period of your schooling and as Chancellor during the past few months, I am delighted to express my congratulations and best wishes to each of you for your accomplishments.

You have completed your medical education and training as a student of Hahnemann University, and these form part of the foundation of knowledge you will need in order to reach your goal of becoming a physician. Beyond the science of healing and health, however, you also will need to understand the relationship of mind, body and spirit as they contribute to an individual's overall sense of well being.

In this time of broadening health-care concerns and shrinking world perspective, it is increasingly important to focus on your ultimate aim: finding new and alternative ways to improve the human condition. For while the rapid refinement and enhancement of technology and information are exciting, it is the nurturing of the human being that will provide your true reward and gratification.

I hope that, in your continuing path to achieve your career goals, you will remember warmly your experiences at Hahnemann, just as the University will recall the contributions each of you has made while you were here.

Sincerely,

Iqbal F. Paroo

Dear Members of the Class of 1994:

It's the day after, after Match Day, that is, and my mind's eye keeps returning to the view from Geary stage as you went wild after opening your Match envelopes. The hugging and kissing and jumping up and down was wonderful to see! It meant that the long years of preparation in undergraduate school and here at Hahnemann had paid off. Your Class did spectacularly well.

You are a special class and each of you will go on to do great things in your individual and diverse fields of medicine. You are a special class in that you have also created special bonds among yourselves and with your institution and its faculty. I hope you will strengthen and preserve these relationships over the years even though many of you will move out of the area.

It has been a privilege to have been a small part of your education and to have assisted in facilitating the Match process. I wish each of you the very best. Congratulations and good luck! (Don't forget to write.)

Sincerely,

Suzanne C. Zarro, M.D.

Dear Members of the Class of 1994,

The time has come for you to move on to new challenges. I am very proud to have been a part of your years here at Hahnemann and both happy and sad to see them coming to a close. At times it may have been difficult, but you have worked, persevered and are now realizing your dream of being called "Doctor". I am sure that all of you will be competent, compassionate, and caring physicians who will bring your own particular talents to the medical profession. It may also be a little frightening, but you have received an excellent education, and are prepared to meet every challenge.

I would like to thank you for making my job both enjoyable and rewarding. Seeing you walk across the stage at graduation, I feel such joy as if you were members of my own family. I value your friendship and wish you success and happiness. I hope you will keep in touch so that we at Hahnemann can share in your successes.

Congratulations to the Class of 1994 from all of us in student life!

Sincerely,

The CHANGES Program

Program Director- Julie McCausland

The CHANGES Program is a hands-on, alternative prevention/intervention program for "at risk" high school students in the Philadelphia area. The program is conducted utilizing resources at Hahnemann University Medical School such as the gross anatomy lab, pathology kodachromes, x-ray films and more to teach basic science and health to students in place of their high school curriculum. Ultimately, we (as future physicians) hope to engender an understanding of how drugs, poor nutrition, and myriad of other "at risk" behaviors disturb the balance inherent to a healthy body.

PRAYER TO ST. JUDE

Most holy Apostle, St. Jude, faithful servant and friend of Jesus, the name of the traitor who delivered your beloved Master into the hands of His enemies has caused you to be forgotten by many, but the Church honors and invokes you universally, as the patron of hopeless cases, of things almost despaired of. Pray for me, I am so helpless and alone. Make use I implore you, of that particular privilege given to you, to bring visible and speedy help where help is most despaired of. Come to my assistance in this great need that I may receive the consolation and help of heaven in all my necessities, tribulations, and sufferings, particularly- (here make your request) and that I may praise God with you and all the elect forever. I promise, O blessed St. Jude, to be ever mindful of this great favor, to always honor you as my special powerful patron, and to gratefully encourage devotion to you. Amen.

Bud

What is the combination to my mailbox? Is there going to be happy hour this week? Who should I talk to if I need (INSERT REQUEST HERE) done, and could you call them for these questions and many other queries could be found by searching out Arliss "Bud" Hefflin. From his office, a chance hallway meeting or the famous Bud's desk (R.I.P), Bud guided hundreds of struggling students through the gauntlet of medical school with a combination of enthusiasm, determination and charm that was unequaled in the University.

Over the years, Bud has been our greatest advocate within the administration, defending students' interests whenever they were threatened. Bud had been involved in every aspect of student life, serving as advisor to the Yearbook, MSI, NoteService, and as a representative on several University committees. Bud was instrumental in organizing many University student functions, including the Halloween and Holiday Parties, the Blue and Gold Ball, and Match Day festivities. His easy-going, down-to-earth style endeared him to the Class of 1994, and we will miss him when we leave Hahnemann.

And Hahnemann will miss him, too. With all of the changes occurring as a result of the acquisition of Hahnemann University by AHERF, Bud left Hahnemann in late 1993 in favor of early retirement. Although we were saddened when his departure was announced, we wish him well in whatever endeavors he should pursue.

In retrospect, medical school was composed of a series of rather unpleasant experiences, interspersed occasionally with short bursts of revelry. Bud Hefflin was one of the few people at Hahnemann who helped to bridge the long (sometimes endless) gaps between those bursts, and was thus an invaluable part of our medical education.

For all of this, we offer our humble and sincere thanks, and we count ourselves fortunate to have known Bud Hefflin.

A very special THANK YOU to those who helped with this year's MEDIC. Your enthusiasm & creativity were indispensable!! Thanks especially to Brooke, Ashley, Jim Z., Anna & Tania for your humor, Susan S., Viv and Eric Gressen for the pics, Becky & Costas!! And a big THANK you to Jean Dorman and Bill O'Brien.

To The Class of 1994:

Congratulations!! We're finally outta here! It's been a rough four (or five) years, but there have been a lot of good times along the way. As a class, I think we've come together better than most. Hopefully the friendships that we've made will last a long time (at least long enough to get some referrals, anyway).

When coming up for a theme for the yearbook, we tried to find something lighthearted but timely. There are so many changes happening now; the new Health Plan, the new H.U., the start of residency, and for many, starting a new family. As we try to gather information to guide us through these times, and find there's no Cecil's or Harrison's to fall back on, we have to remember not to believe everything we read or hear. There are many people who would change us or our professions to fit their desires. Some of their ideas have merit, some don't. Figuring out which is which makes K-types look easy. I guess the best we can do is keep our priorities in mind, watch out for our patients' best interests, and be true to ourselves. Hopefully, that will help us filter through the nonsense.

We'd like to thank everyone who contributed their time, pictures, and creativity to this year's Medic-Ashley, Brooke, Jim Z., Anna, Tania, Viv, Susan S., Eric Gressen, Becky and Costas, and Jean Dorman and the Student Activities Office. We never would have survived without you!

We wish everyone great success and may there be a giant Italian Hoagie in your future.
